Honeywell Home Radiator Valves and Thermostats

V2211/V2212

Fourway Distribution Valves Connection valves for distribution systems

APPLICATION

Fourway distribution valves are used to connect the supply and return of a radiator to the heating loop. Individual radiators can be shut-off without affecting or interrupting the water flow of the heating loop.

By using distribution valves connections under the floor or in the wall are avoided. Angle pattern valves can be used on the left or on the right side of a radiator.

V2211 distribution valves are used for one-pipe systems and have a radiator flow share of 50 %. V2212 distribution valves are used for two-pipe systems and have a radiator flow share of 100 %.

FEATURES

- No connections under the floor necessary
- Shut-off does not affect other radiators in the loop
- For 2-pipe systems
- With G ³/₄" (Eurocone) external threads

SPECIFICATIONS

| Medium: | Water or glycol-water | | |
|---|---------------------------|--|--|
| | mixture, according to VDI | | |
| | 2035 | | |
| Operating temperature: | 2 - 100 °C (36 - 212 °F) | | |
| Operating pressure: | PN10 | | |
| k _{vs} (c _{vs})-value: | V2211: 2.7 (3.16) | | |
| | V2212: 1.5 (1.76) | | |

FUNCTION

The distribution valve supplies incoming heating water to the connected riser tube and heating water returning from the radiator back into the heating loop.

The radiator is shut-off from the heating loop when the valve insert is closed. Following radiators in the heating loop are not affected by this.

DESIGN

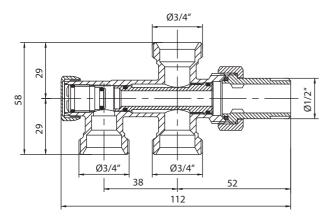

The distribution valve consists of:

- Valve housing PN10, DN15 with G³/4" external threads
- Shut-off valve insert
- Protection cap
- Union-nut and radiator tailpiece

MATERIALS

- Valve housing made of nickel-plated brass
- Valve insert made of brass with EPDM O-rings
- Union-nut, tailpiece and cap made of nickel-plated brass

DIMENSIONS AND ORDERING INFORMATION

Fig. 1. Straight version

Note: All dimensions in mm unless stated otherwise.

Tab. 1 Dimensions and OS-Nos (OS=Ordering System)

| Item | Description | OSNo. |
|--------------|---|-------------|
| V2211X floor | Fourway distribution valve for one-pipe systems (radiator share 50 %), straight version, floor connection | V2211XD0020 |
| V2211X wall | Fourway distribution valve for one-pipe systems (radiator share 50 %), angle version, wall connection | V2211XE0020 |
| V2212X floor | Fourway distribution valve for two-pipe systems, straight version, floor connection | V2212XD0020 |
| V2212X wall | Fourway distribution valve for two-pipe systems, angle version, wall connection | V2212XE0020 |

PLEASE NOTE:

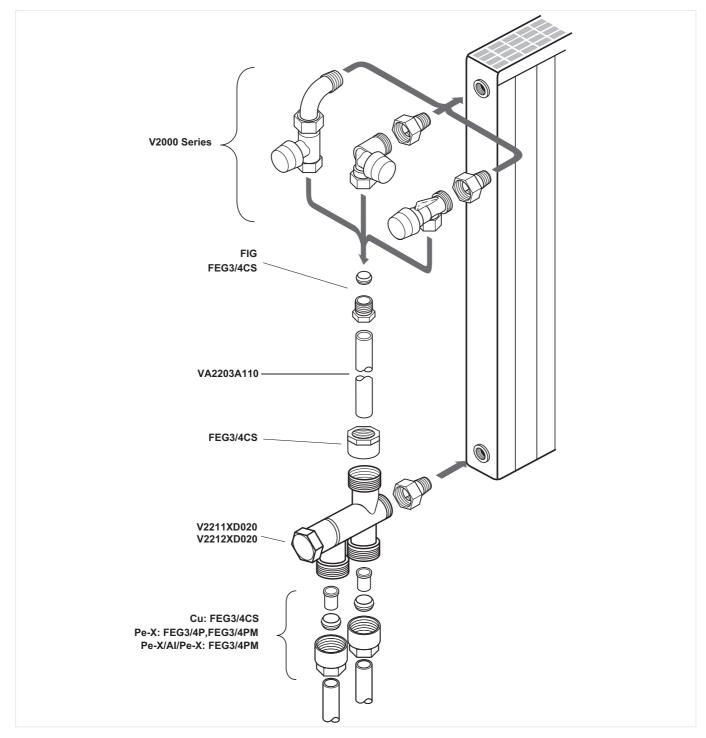

- To avoid stone deposit and corrosion the composition of the medium should conform with VDI-Guideline 2035
- Additives have to be suitable for EPDM sealings
- System has to be flushed thoroughly before initial operation with all valves fully open
- Any complaints or costs resulting from non-compliance with above rules will not be accepted by Honeywell Home
- Please contact us if you should have any special requirements or needs
